

# NOVA

recessed hands-free audio and video receiver

Silver audio/video receiver

White audio/video receiver

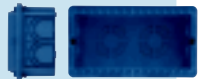

Anthracite grey audio/video receiver

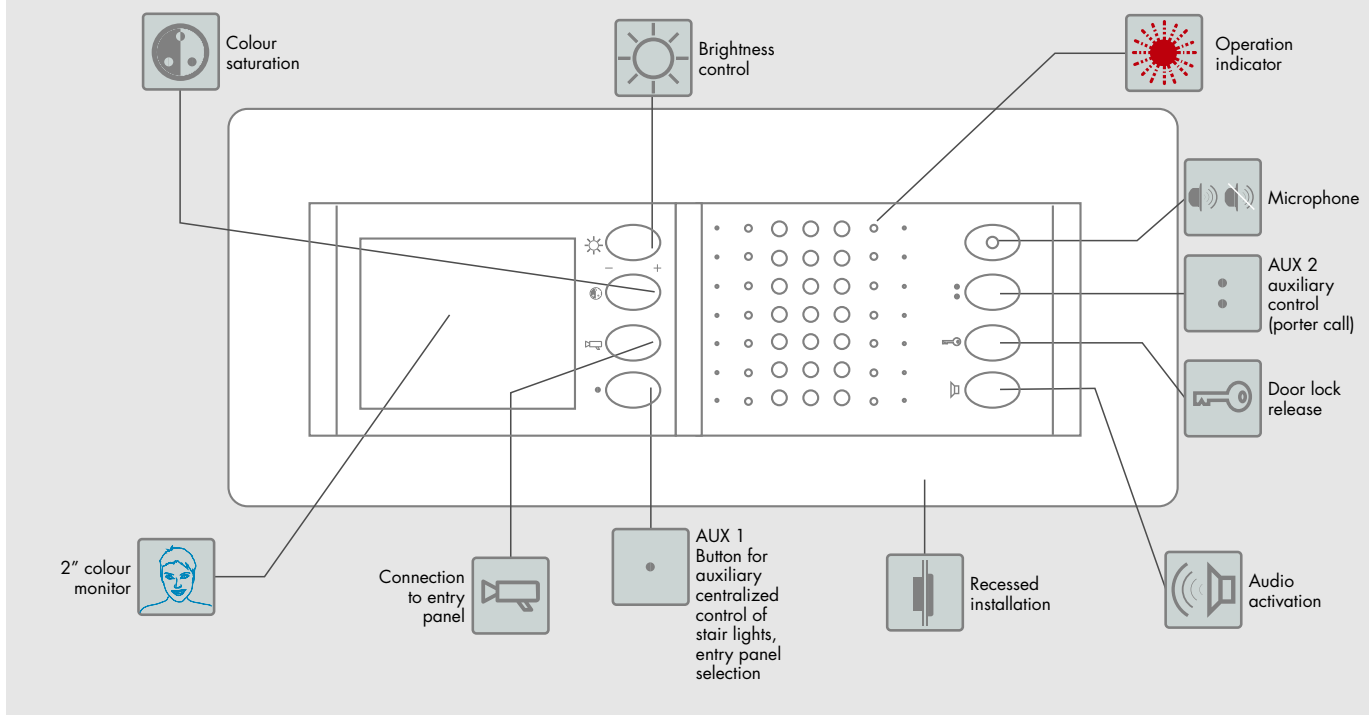

Audio receiver module

**Bpt's** exclusive recessed, hands-free, colour video receiver. Thanks to its small dimensions, Nova can be inserted in the standardised 3 or 6-module embedding boxes and can be framed with a choice of standard cover plates. Being compatible with all other system elements, it enables mixed installations to be created with audio-only handsets and hands-free receivers or twin-channel receivers. The Nova installation in table-top version is now possible with the NST/61 support use.
